

Title: RESEALABLE CLOSURE FOR PACKAGE

Abstract

5 A resealable closure for a container is described which includes a
container having a main body portion and an integral extended body portion
foldable over a part of the main body portion; and a releasable enclosure
comprising a release surface and a releasable adhesive having a peel strength
up to about 1 pound per inch, in which (a) the release surface is adhered to
the main body portion and the releasable adhesive is adhered to the extended
10 body portion, or (b) the releasable adhesive is adhered to the main body
portion and the release surface is adhered to the extended body portion.
